## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 21-40 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 21, the examiner is unsure if applicant is claiming the combination of jig and the pair of work pieces or the subcombination of jig, only. This in turn, is because while line 1 of the claim appears to indicate that applicant's intention is to claim only the jig, other portions of the claims recite limitations which are dependent on the wood pieces (Note: line 11, **for example only**). In this Office Action, the examiner presumes that the applicant's intention is to prosecute the subcombination of the jig, in order that the claims are given their broadest reasonable interpretation. Accordingly, all additional limitations that are dependent on the work pieces are not considered further structurally limiting with respect to the claimed device.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3725

Claims 21-40 are rejected under 35 U.S.C. 102(b) as being anticipated by Lloyd (US Patent 5024257).

The device of Lloyd meets the elements of the claimed limitations including a bottom plate (74), a rear plate (36), an alignment member (42 or 44), a first and second adjustment (100), a front plate (142), handle (160), at least one marker (32 and 50) and a post (196).

### ***Response to Arguments***

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
